For people on Android phones, goto the android market and search internet radio, find a program called 'MediaU Radio'

Once installed then search by location and choose 'Internet only' then 'all' and in that list you will find the 128K EVE Radio stream.

Unfortunately this will only play with the full version of MediaU Radio, but it only costs \$1.99 or £1.25 in GBP, you can buy this app direct from the market or upgrade in the player using paypal.

Hope this helps the Android users!!

Or use 'tunein radio' (android) for free ☺
I use it every day, to find eve radio just search for it and voila! It'll then recommend similar channels which are generally gamer-centric.

Hey, lately I noticed that the stream has been moved to a different address, evehost.net instead of completegamer.net

Has the low-quality/mobile stream been switched over yet? If so, can I get the address please 🍌

Mobile streams will be back up and running in the next day or two. The final stages of the migration is the tidy up stuff which Gaz needs to be present for but as he's away this bank holiday weekend it's hard for him to do any constructive work.

Nearly there!
