

Jukebox v2 | Marvins Revenge

Posted by MrBlades - 15 Apr 2015 23:38

As detailed [HERE](#) Eve Radio has just published it's brand new and vastly improved Jukebox system.

Currently considered a beta release, there are a number of functionality issues which we are still in the process of correcting before we can confidently state we are 100% happy with it.

The known issues are detailed below :-

Known Issues (as of 16/04/15):

- Pagination Fail (Searching listings beyond the first page doesn't work)
- Song Comments not taking spaces or punctuation
- Some song and album graphic is incorrectly tagged due to "best guess" automated tagging getting it wrong.
- Some album art isn't correctly displaying due to a number of soon to be resolved issues.
- Occasional page refreshes necessary on homepage to advance recently played content display

We are working to correct these as quickly as possible but if you find anything else "broken" or not functioning as you'd expect, please let us know here so we can verify and correct if a bug.

Enjoy the new Jukebox and please leave any non bug related comments in this in different threads.

Update (As of 4/20/15):

- Album art is still being worked on, coming along but slowly

- pagination is Fixed! (Albeit there's still some tweaks to make it look pretty, but going between pages works now! Yay me!)

Update (5/17/15):

- All album art should now be displayed correctly!
